Guedel Airways 2

GUEDEL AIRWAYS

GUEDEL AIRWAY 00 DARK BLUE

Complies with health industry standards.

Complete range of seven sizes.

Opaque pack for pre-use inspection.

Designed for free air flow, by protecting from airway occlusion from the relaxation of the tongue in an unconscious patient. The top colour coded section is thickened for protection from biting, ideal for seizure patients and unprotected airways. Guedel airways are designed for use by adequately trained professionals.

The correct size of airway is chosen by measuring and aligning the flange of the airway with the centre of the patients lips and the tip touching the angle of the jaw. Should the airway not reach this distance a larger one should be selected. equally, should the airway greatly exceed this distance, a smaller one should be utilised.

Suggested use - newborn to children.
